PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on internship experience building scalable MERN stack web applications. Proficient in React.js, Node.js, Express.js, MongoDB, and RESTful API development. Delivered 10+ reusable React components across 2 client projects, resolved 15+ bugs, and reduced code duplication by 30%. Adept at Agile collaboration, responsive UI development, and full-stack deployment. Eager to contribute immediately and grow within a fast-paced engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6), Python, SQL

Frontend: React.js, HTML5, CSS3, Redux (React-Redux), Context API, Hooks

Backend: Node.js, Express.js, RESTful API Development

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Axios, Fetch API, VS Code

Deployment: Vercel, Netlify, Render

Core Concepts: Data Structures & Algorithms, OOP, CRUD Operations, Debugging, Responsive Design

PROFESSIONAL EXPERIENCE

React JS Developer Intern | Talentrise Technokrate Pvt. Ltd.

Jun 2025 – Dec 2025 | Remote

- Engineered 10+ reusable React.js components across 2 client projects implementing full CRUD operations, reducing code duplication by ~30% and accelerating feature delivery.
- Built responsive, dynamic UIs using React Hooks (useState, useEffect) for optimized state management and component lifecycle control.
- Integrated RESTful APIs via Axios and Fetch API for real-time data rendering, ensuring seamless frontend-backend communication and reducing latency.
- Collaborated in a 3-member Agile team using GitHub (branching, pull requests, code reviews) and Figma for design handoffs, ensuring on-time sprint delivery.
- Identified and resolved 15+ UI and API bugs, improving application stability, load performance, and overall user experience across all tested devices.

PROJECTS

Pench Go With Nature — React.js · Node.js · Express.js · MongoDB · Vercel · Render | GitHub

- Developed modular, responsive React.js components for Dashboard, Products, and Delivery Management modules, improving UI consistency across all devices and browsers.
- Integrated RESTful APIs to fetch and render live data including real-time orders, inventory counts, and delivery status, enabling data-driven decision-making.
- Achieved full mobile responsiveness and cross-browser compatibility; deployed frontend on Vercel and backend on Render for production-grade performance.

Inventory Search Application — React.js · Node.js · Express.js · MongoDB · Vercel · Render | GitHub

- Architected a full-stack MERN inventory search app featuring dynamic filtering by product name, category, and price range using MongoDB query operators.
- Designed a RESTful API with URL query parameter-based communication between frontend and backend.
- Enhanced UX with controlled React components, instant search feedback, and clean state-driven data updates.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering

2020 – 2024

GMR Institute of Technology, Rajam, Andhra Pradesh
